Transformation of Manual Tax declarations to Electronic Tax Declarations

SEPTEMBER 2019 . ISSUE #2

NEWSLETTER

HIGHLIGHTS & INSIGHTS

Khodeir Consulting is leading jointly with Excel Egypt and Laurel Hungary, the transformation of the normal static cashier system to the advanced electronic cash register, which links directly the data to the Egyptian Tax Authority.

Our approach is to facilitate for the tax payer community and the tax department, a closed, secure, fast link in the data transformation and data compilation.

The system is the first in the ME region, replicated from Europe to upgrade the tax authority services and facilitate to the investor or payers a one transaction data link, and automated compilation that will ease the data storage and be more precise for both parties.

This transformation is pivotal in the world of finance, accounting and governmental proceedings, where the client will be spared drastic time and cost, and have their tax declarations electronically processed in a timely and efficient manner, unlike manual tax declarations. This development by the government with the Online Cashier, will facilitate an easier and better business atmosphere for the tax payer society and for investors.
