■ PAPER INVOICES  
■ E-INVOICES

**According to the latest research by Billentis, 550 billion invoices are processed annually and only 10% of these are paperless.**

Statistics show that most finance teams spend at least five days a month processing invoices manually. Yet this task can easily be automated, saving your company up to 81% of processing costs and 73% of processing cycle time.

### **KHODIER CONSULTING**

**builds organizations where both the business and the people thrive.**

## WORK SMARTER NOT HARDER!

Your employees' time is truly precious, and no matter how much money you invest in time management trainings, manual data entry could still be very time consuming, thus electronic invoices will allow staff time to prioritize more meaningful tasks, such as building customer relationships, improving internal processes and ensuring invoices are paid on-time.

## WORK THE SMART WAY!

Improving cash flow for you and your suppliers allows both of you to distribute that working capital into other areas, such as investments or process optimization. Electronic invoicing will ensure that invoices won't be lost in the mail or trapped in your processing queue, leading to delayed payments. Electronic invoices system can even minimize cash flow gaps significantly through faster invoices processing as it gives suppliers the ability to request early payments if needed. Having total visibility into the invoices processing will empower you to have access to updated figures of corporate spending and collections while ensuring compliance regulations are being followed.

## GREEN = SMART!

Egypt's government is on a mission not only to 'think green' but also 'act green' in all policies and projects to help preserve the environment and enhance the quality of life.

Eliminating paper invoices and choosing electronic invoicing will help increase your internal productivity, decrease operational costs and reduce your carbon footprint. By choosing to streamline the invoicing process with automation, you are choosing to optimize your business and be part of Egypt's 2030 vision for digital transformation.

## WHY TO CHOOSE US FOR YOUR SMART TRANSFORMATION?

As a member of the GMNI International Association of quality professional accounting firms, Khodier Consulting has been committed for more than 80 years to service the needs of clients - from start-ups to fast growing businesses, utilizing global knowledge from a local perspective.
